🐙 github.com/123Mike-ops

PROFILE

Experienced Back-end Developer with expertise in Java (Spring Boot) for building scalable and complex projects and Node.js (Express.js) for real-time helper services. Also Proficient in Vue.js for front-end development, adept at crafting responsive and dynamic user interfaces for both Java Spring Boot and Node.js applications. Skilled in micro-service architecture, utilizing modularity and flexibility to architect robust systems.

WORK EXPERIENCE

Backend Developer, *Inspur Communication Jinan, Shandog China*

08/2023 – Present
Addis Ababa, Ethiopia

Responsibilities

- Enterprise application development using **Spring Boot** and **Node.js**
- Secure API and service development with **Spring Security** (authentication, authorization, role-based access control)
- Data persistence and ORM using **Spring Data JPA** and **Hibernate**
- Input validation and request integrity using **Hibernate Validator**
- Build automation and dependency management with **Maven**
- Centralized logging and monitoring using **Logback**
- RESTful API design and documentation using **Swagger**

Selected Projects

1. E-Commerce Platform

<https://megenagna.com.et> 🔗

- Developed and maintained backend services for a production-level **e-commerce platform**
- Implemented secure authentication and authorization using **Spring Security**
- Designed database schemas and repositories using **Spring Data JPA**
- Built RESTful APIs consumed by frontend and third-party services
- Ensured scalability, data consistency, and performance optimization

2. SILKROAD General Hospital – Appointment Management System

🔗 <https://www.silkroadhospitaladdis.com> 🔗

<https://www.silkroadhospitaladdis.com/appointment> 🔗

- Designed and implemented an **appointment scheduling and management system** for a hospital environment
- Developed backend services for patient appointments, scheduling, and administrative workflows
- Applied **role-based access control** using Spring Security for staff and administrators
- Ensured data integrity and validation using Hibernate Validator
- Delivered APIs with comprehensive documentation using Swagger

3. Multi-Tenant Restaurant Tracking Application

- Built a **multi-tenant backend architecture** supporting multiple restaurants under a single platform
- Implemented tenant-aware data isolation using Spring Data JPA

- Designed APIs for order tracking, restaurant management, and analytics
 - Focused on scalability, performance, and maintainability
4. Parking Spot Management System (Surveillance-Based)
- Developed backend services for **parking spot monitoring and management** integrated with surveillance systems
 - Implemented real-time data handling and system coordination
 - Designed secure APIs and logging mechanisms for system traceability
5. Customer Authorization Platform – Ethio Telecom
- Contributed to a **customer authorization and identity management platform**
 - Implemented secure authentication and authorization flows using **Spring Security**
 - Designed backend services with emphasis on **security, scalability, and reliability**
 - Ensured compliance with enterprise-level security and logging standards

Back-end Developer, 2F Capital Ltd.

06/2021 – 07/2023
Addis Ababa, Ethiopia

Responsibilities

- Backend development using **Golang** and **Node.js**, with a focus on scalable and high-performance systems
- Strong experience with **Behavior-Driven Development (BDD)** using **Godog, Gherkin, and Cucumber**
- API design and documentation using **Swagger / OpenAPI**
- Database development with **PostgreSQL**, utilizing **pg ORM** and **sqlc** for type-safe queries
- Structured and performant logging with **Pino logger**
- Emphasis on clean architecture, maintainability, and production-ready code

Selected Projects

Subscription Management & Payment Platform

<https://subscription.sewasewmusic.com> 

- Designed and implemented backend services for a **high-traffic subscription platform** using Golang
- Integrated multiple payment gateways, including **Telebirr, Enat Bank, and Commercial Bank of Ethiopia (CBE)**
- Built secure, reliable transaction processing workflows with strong error handling and logging
- Platform successfully processes **50,000+ active transactions per week**, ensuring high availability and consistency
- Developed and maintained RESTful APIs with clear documentation for frontend and third-party integrations
- Collaborated on testing strategies using BDD to ensure business-critical features met requirements before deployment

EDUCATION

Bachelor of Science in Software Engineering,
Addis Ababa Science and Technology University
with CGPA of 3.4

2017 – 2021

SKILL ELABORATION

Spring boot(Java)

- Spring Security, Spring Data JPA, Log-back, Swagger, Hibernate Validator, Maven.

Vuejs, (Mainly) and Reactjs (intermediate)

- use tailwind, Element-UI, Material ui, Vuetify for styling, vuex for state management

Nodejs with express

- swagger api doc, Pino for logging, ORMS and pgx query management.

Devops

- with gitlab cicd, microsoft azure (Dockerizing for building and environment Management, test, pre-production, production environments. nginx for web-server management. Running Build, running test, rollout to production postgresql, mysql, mongodb databases
